Hofmann.
Intelligent Balancing Solutions

Become part of the Hofmann family -

Your next job:

Software developer / software engineer (m/f/d)

What can you expect as a software engineer (m/w/d) for measurement applications at Hofmann Mess- und Auswuchttechnik?

Everything that rotates must operate precisely – that is Hofmann's motto. As a specialist in measurement and weighing technology, we develop innovative machines and measurement systems for customers worldwide.
To further develop our software, we are looking for people who not only enjoy programming but also want to understand what their software does on a machine.

Software developer / software engineer (m/f/d)
Industrial measuring and weighing technology

Pfungstadt | Starting immediately | Permanent, full-time

Your tasks

- **Software development:** They develop our measurement and weighing software using C#/.NET and actively contribute to its further development.
- **Data processing:** They apply mathematical methods and algorithms to process, analyze, and visualize measurement data.
- **User interfaces:** They develop modern, intuitive user interfaces, for example using WPF or Blazor.
- **Machine connection:** They integrate controls, sensors and measurement systems via industrial interfaces.
- **Testing and commissioning:** They test their software directly on our machines, analyze measurements, and solve technical problems.
- **Responsibility:** Depending on your experience, you will increasingly take on responsibility for software architecture, technical decisions, and product development.

Your qualifications

- Studies in computer science, electrical engineering, mechatronics or a comparable qualification.
- Good knowledge of C#/.NET and object-oriented software development.
- Interest in mathematics, physics and technical connections.
- Curiosity about measurement technology, sensorics and signal processing, as well as a passion for understanding complex machines and their functions.
- An independent, structured working style and a passion for collaborating with other technical departments.
- Very good German and English skills, as well as willingness to occasionally travel for work.

Experience in weighing technology is not required – we will provide you with that.

Whether you are a recent graduate or an experienced developer: We offer tasks and responsibilities that match your skills and development opportunities.

Your benefits

- Exciting development tasks with great scope for creative freedom and a long-term perspective.
- The possibility to test your own software directly on real machines.
- Individual development opportunities, including technical product responsibility.
- Intensive onboarding and a collegial team with short decision-making processes.
- Flexible working hours, performance-based remuneration and 30 vacation days.
- Corporate bike leasing, monthly 40 EUR voucher card, subsidies for VWL and bAV, and free parking spaces.

Have we aroused your interest?

Then we look forward to receiving your comprehensive application documents. Please state your earliest possible start date.
