Your next job:

Hardware Design Engineer

What awaits you as a Hardware Design Engineer / Electrical Designer (m/f/d) at Hofmann Measuring and Balancing Technology?

At Hofmann Mess- und Auswuchttechnik, we combine many years of experience with an eye for future-oriented innovation in balancing and vibration control technology. Our individual solutions based on a wide range of services relating to the balancing of rotating parts and the measurement and analysis of vibrations are at the heart of our portfolio. We invest in research and development and provide our customers with comprehensive service through our global sales partners.

We are looking for our innovative and successful HOFMANN team immediately

Hardware Design Engineer

Effective immediately, permanent, full-time

Your tasks

- Independent hardware development and project planning of electrical and automation engineering systems with a focus on switchgear and control cabinet construction.
- Creation and maintenance of manufacturing and delivery documentation based on specifications and requirements documents, customer-specific guidelines, and applicable standards (including DIN EN 61439, IEC 60204-1), including component selection and sizing of equipment.
- Development of order-related circuit, terminal, and fluid diagrams with EPLAN Electric P8
- Generation and maintenance of order-related bills of materials (BOM) in the ERP system
- Review and release of design and manufacturing documents
- Technical coordination and support of external service providers and suppliers

Your qualifications

- Successfully completed training in the field of electrical engineering or further training as a state-certified technician
- Technical vocational training with relevant professional experience, technician in electrical/automation engineering, mechatronics, or a comparable engineering degree
- In-depth experience in hardware design of control cabinets with PLC controls (e.g., Siemens TIA Portal/S7) as well as industrial IT and network technologies (e.g., PROFINET, Ethernet/IP)

Your skills

- Very good user knowledge of EPLAN Electric P8 required
- Good written and spoken English skills
- Fluent German language skills, both written and spoken
- Secure handling of customer requirements (specifications, project scope, material releases)
- Structured, results- and solution-oriented way of working
- Strong team and communication skills
- Flexibility and resilience

Your benefits

- Individual development opportunities with plenty of scope for employee empowerment
- Flexible working hours and home office
- Performance-related remuneration
- Intensive onboarding in our processes and products
- Leasing a company bike
- Voucher card with monthly EUR 40 top-up
- 30 vacation days
- Subsidies for VWL and BAV
- Sufficient free parking spaces on our company premises

Have we aroused your interest?

Then we look forward to receiving your comprehensive application documents. Please state your earliest possible start date.
